Kevin Lim

Full Stack Developer

Profile

Experienced Full-Stack Developer with a passion for designing and implementing high-quality web applications.

Expertise in front-end and back-end development, utilizing multiple programming languages, frameworks, and databases.

Proven track record of developing and deploying web applications from scratch, optimizing existing applications for improved performance, and conducting testing and debugging activities.

Dedicated to staying up-to-date with the latest technologies and approaches.

Committed to delivering innovative solutions and contributing to the success of any project.

Employment History

Full Stack Developer at Grab, Singapore

January 2021 — April 2024

- Designed and implemented 30 web applications from scratch, utilizing programming languages such as JavaScript, Python, and PHP.
- Collaborated with cross-functional teams on 25 projects, ensuring timely delivery within budget constraints.
- Optimized 5 existing applications for improved performance, resulting in a 30% reduction in loading times and increased user engagement.
- Conducted testing and debugging activities, including manual and automated testing, resulting in a 20% decrease in reported bugs by end-users.
- Utilized Agile methodologies, including Scrum and Kanban, to manage project backlogs and facilitate daily stand-up meetings.
- Stayed up-to-date with the latest technologies and approaches, integrating new tools and frameworks such as React.js, Node.js, and MongoDB to improve efficiency and innovation.
- Mentored 2 junior developers, providing guidance and support in their professional development and contributing to a positive team culture.
- Contributed to the success of the company by consistently meeting project deadlines and exceeding expectations.

Languages English

July 2018 — December 2020

- Worked on a team responsible for developing and maintaining 5 web applications from scratch, utilizing various programming languages and frameworks, resulting in a combined user base of over 100,000 active users.
- Collaborated closely with clients to ensure project requirements were met and any issues were addressed in a timely manner, resulting in a 95% satisfaction rate among clients.
- Conducted testing and debugging activities, including manual and automated testing with Selenium WebDriver, resulting in a 25% decrease in reported bugs by end-users.
- Improved application performance and user experience through front-end optimizations, including implementing lazy loading and image compression techniques, resulting in a 20% increase in user engagement.
- Gained experience in database management and optimization, utilizing MySQL and Amazon Web Services AWS to store and retrieve data efficiently.
- Consistently met project goals and timelines, earning recognition from both clients and management.

Full Stack Developer at ByteDance, Singapore

August 2017 — June 2018

- Delivered outstanding results on a consistent basis, including designing and implementing innovative software features that enhance user experience and improve business processes.
- Committed to staying up-to-date with the latest technologies, trends, and best practices in full-stack development to deliver cutting-edge solutions that drive business growth and success.
- Improved user interfaces by updating menus to be more intuitive, attracting 5% more clients than the previous quarter.
- Engineered a bookkeeping system that automated financial transactions and invoicing processes.
- Learned new technologies and frameworks, such as Angular and Vue.js, to expand the skillset and contribute to the development of new projects.

★ Projects

Online Marketplace Web Application, Grab

October 2022 — February 2023

 Led the development of an online marketplace web application for selling consumer goods using Node.js, MongoDB, React.js, Redux, and Bootstrap. Conducted extensive testing and debugging activities, resulting in a high-quality product with optimized performance and security.

Social Media Platform, Lazada

October 2018 — February 2019

- Worked as a Full-Stack Developer on a team responsible for developing a social media platform for sharing photos and videos using PHP, MySQL, HTML, CSS, JavaScript, and jQuery.
- Designed and developed REST APIs and implemented security features such as CAPTCHA and email verification for a seamless userexperience.

Education

Bachelor of Science in CS, Nanyang Technological University, Singapore

August 2013 — May 2017
